New PipeGuard Literature Available from OMG Roofing Products

AGAWAM, Mass., June 23, 2009 – OMG Roofing Products has released new literature on its full line of OlyFlow PipeGuard pipe supports, the industry's preferred method of supporting rooftop pipes.

The two page color brochure provides complete technical, sizing and installation information. PipeGuard is available in six sizes, including the new Multi-Strut PipeGuard and will accommodate steel, copper and PVC pipe, electrical conduit as well as gas lines ranging in size from ½- to 5-inches in diameter. Depending on the model selected, PipeGuard will hold piping and conduit off the roof at heights ranging from 1.5- to 8.5-inches.

OMG PipeGuard is an easy-to-use alternative to commonly used wood block supports that deteriorate and can damage commercial roofing systems. Made of heavy-duty EPDM, PipeGuard will not deteriorate from water or sunlight exposure and does not require any special installation tools, slip-sheets or clamps.

The new literature is immediately available through OMG's extensive commercial roofing distribution network. For a copy or additional information, visit www.olyfast.com or call (800) 633-3800 or email info@olyfast.com.
