OMG ReelFast Literature Now Available

-- More productive method for mechanically attaching single-ply membranes --

AGAWAM, Mass., August 14 – OMG ReelFast provides contractors with 2 3/8-inch EyeHook® Plates in an easy-to-handle and install collated reel, which improves installation efficiency. A new one page, two sided sheet provides all of the relevant details.

Sold exclusively through roofing system manufacturers, each ReelFast reel includes 500 plates with 6- or 12-inch on center spacing. The system is designed for use with OMG manufactured heavy duty (#14) or extra heavy duty (#15) roofing fasteners when mechanically attaching single-ply membrane to steel, wood or structural concrete decks.

Pre-spaced plates eliminate the need to measure for accurate fastener placement, help to find the high ribs on steel decks and minimize the frequency with which mechanics have to reposition unfastened plates. In addition, unwinding plates from ReelFast dramatically cuts labor when compared to individually shuffling and placing plates, and installation is more ergonomically friendly, with less bending and kneeling.

For additional information or a FREE copy, call 800 633-3800 or visit <http://www.olyfast.com/product.aspx?currentPage=11&catID=13&prodID=611>.
