

# What would *you* do to make the earth a little greener?

Securing flat-roof insulation used to be a dirty job. Polyurethane roofing adhesives cleaned up the mess some, but not enough. OlyBond500 Green takes the next step in eco-friendliness. This dual-component polyurethane adhesive is VOC free, and replaces petroleum components with plant-based resources. OlyBond500 Green gives you solid adhesive performance while lowering your project's impact on the environment.
